

**Prevalence of symptoms in patients with Morquio A<sup>27,a</sup>**

Adapted from Harmatz, *Mol Genet Metab*, 2013.

Abbreviation: ENT, Ear, nose and throat.

<sup>a</sup> 25% of patients with Morquio A are classified as nonclassical.

<sup>b</sup> Percentages reflect prevalence of symptoms in 325 patients as reported in the Morquio A Clinical Assessment Program (MorCAP) study.

<sup>c</sup> The range indicated refers to the incidence of cardiac valve regurgitation in adult patients (n=69; 28% mitral, 32% tricuspid, 39% aortic).

<sup>d</sup> The range indicated refers to the incidence of reported spinal abnormalities (65% odontoid dysplasia, 49% cervical spine instability).
